The **SmokeSafe™ DRAFT CURTAIN SYSTEM** is a reliable and proven smoke-containment solution for commercial and industrial structures. There is no system that is installed more quickly and with less mess. We provide a full 2-year warranty that is twice the industry standard. The system is used in commercial, industrial, and healthcare structures for general smoke containment, smoke control, sprinkler separation, and draft-stopping.

ADVANTAGES

- Installed only by Smoke Containment Solutions — one source, one solution, and one point of contact!
- Installed in a fraction of the time compared to traditional, rigid, draft curtain systems.
- Supported by the existing structure so no new welding or steel work is required.
- Very lightweight adding minimal new load to the existing structure; perfect for retrofits and renovations.
- Customizable to any depth or length that is required.
- No maintenance is required.
- Very simple to penetrate and reseal the curtain when future piping, cable trays, ducts or other utilities are required.
- Full 2-Year Warranty.
- Design assistance and recommendations.

2-YEAR WARRANTY

All components of the SmokeSafe™ System are warranted and guaranteed for a full 2 years following the completed date of installation.
